Professional Summary

Detail-oriented and analytical Business Analytics professional with hands-on project experience in Advanced Excel, SQL, and Power BI. Skilled in data cleaning, transformation, analysis, and reporting, with a strong understanding of data-driven decision-making. Adept at identifying trends, improving data quality, and translating complex datasets into meaningful business insights.

Projects

Shell Pump Data Analysis (Advanced Excel) | GitHub Repository

Dataset: 10,000 Records

- Analyzed 10,000 fuel station transaction records using Microsoft Excel to support sales and operational reporting.
- Organized and prepared transactional data using data cleaning, sorting, filtering, and spreadsheet formulas.
- Worked with monthly sales, operational shifts, and payment-method data to support comparative analysis.
- Used Excel analytical tools, including lookup functions and Pivot Tables, to organize and summarize business data.
- Developed reporting worksheets for monthly, shift-wise, and payment-method analysis.

Airlines Management System (SQL) | GitHub Repository

Database: 10 Tables | 1,000 Records

- Developed a relational Airlines Management System database using MySQL, comprising 10 interconnected tables and 1,000 records.
- Worked with structured tables and SQL queries for retrieving, filtering, and managing records.
- Managed structured data related to passengers, flights, bookings, tickets, payments, airports, and baggage.
  Performed data filtering, aggregation, and reporting to extract meaningful operational insights.Cee

BMW Showroom Data Analysis (Power BI) | GitHub Repository

Dataset: 25 Tables, Approximately 9,134 Records

- Worked with a multi-table BMW showroom dataset in Power BI to prepare automotive business data for analysis.
- Used Power Query Editor to clean, transform, and standardize datasets from multiple tables.
- Applied data-type corrections, formatting, and transformation operations to improve data consistency.
- Prepared structured datasets for further data modeling, reporting, and dashboard development.
- Focused on data preparation techniques required for analyzing showroom sales, customers, vehicles, and business operations.

Education

Bachelor of Engineering -- Computer Science **2022 -- 2026**
Sant Gandge Baba University , Amravati *Amravati,Maharashtra*

- CGPA: 7.63 / 10.0

Technical Skills

Advanced Excel: Data Cleaning, Sorting & Filtering, Formulas, Pivot Tables
SQL: Data Retrieval, SELECT Queries, Filtering, GROUP BY, JOINs
Power BI: Power Query, Data Cleaning, Data Transformation, DAX

Certificate

- Business Analytics With Excel – Microsoft
- Advance Excel – IT Vedant
- MySQl – IT Vedant
